

NIFTYLIFT HR12NDE

The HeightRider 12 self-propelled boom lift is one of the most versatile and reliable machines in its class.

It is specifically designed to give maximum reach performance from the lightest, most compact base possible. A telescopic upper boom gives the HR12NDE improved accuracy when positioning the platform and superb manoeuvrability makes it ideal for a wide range of applications.

With a 1.50m (4ft 11in) narrow chassis, the HR12NDE is ideal for working in factories, warehouses or any-where that space is restricted.

Its Bi-Energy option allows the HR12NDE to work for extended periods inside and outside, making it the perfect all-rounder.
